

Collaboration EVS- WVS

The European Values Study and the World Values Survey agreed to collaborate in carrying out the 2017 values survey in Europe as defined in the [Memorandum of Understandings](#), signed in 2016.

In line with this agreement, both organizations coordinated the questionnaire’s design and the overlap in the two questionnaires is about 70%. In all European countries, the EVS questionnaire is applied and data collection is coordinated by EVS according to the strict [methodological guidelines](#) prepared by EVS Methodology Group that are specifically adapted to the European context.

The collaboration takes place in different forms and the Table below resumes them.

In some countries a unique team is involved since a long time both in EVS and in WVS (“EVS-WVS Team”); in other countries the two organizations have different partners: in some cases they cooperate for carrying a single survey with split sample (“Joint EVS-WVS Teams”), in others separate data collections are taking place (“EVS Team; WVS Team”).

Country code ISO-3166	Country	Under the agreement EVS-WVS	Data collected by	Further notes
